## Call for Research Article/Workshop/Technical Report

Innovation plays the main role in the Industrial and Economic growth of a country. In 2009, the Boston Consulting Group, the National Association of Manufacturers and the Manufacturing Institute jointly produced International Innovation Index that measures the level of Innovation of a country. India ranked 15th among large countries and 46th among small and large countries. One of the main identified reasons for such low rank is that within secondary and higher secondary education system the science and technology education is not in Indian Languages in India. It is in English which causes Indian students mug up science. And that's why they are not able to understand & solve practical problems involving science and technology. In continuation to solve these issues, a team of committed academician came forward and is organizing a Conference that provides a platform to communicate Scientific and Technological discoveries in Indian Languages by bridging the geographical boundaries. The conference Bhartiya Bhashaon Mein Antarrashtriya Vigyaan Sangoshti has been started in 2017. The previous proceeding can be seen at [BBAVS 18](#) and [BBAVS 17](#).

"Bhartiya Bhashaon Mein Tiritiya Antarrashtriya Vigyaan Sangoshti (BBAVS-2019)" has been scheduled on September 14-15, 2019 in this direction. It will provide a platform for researchers to make scientific and technical discoveries in Indian languages.

The submissions have been invited from related fields: **Mathematics, Science (Physics, Chemistry and Biology), Economics, Management, Engineering, Medicine, Innovation / Jugaad.**

## Guidelines for proposing Research Article/Workshop/Technical Report

We are accepting articles in Indian languages preferably: Hindi, Punjabi, Bengali, Tamil, Marathi as the medium of language and presentation. The length of the research paper should be of 4-6 pages. See <http://bbavs.org> for more information and workshop presentation.
